

## Internet One Sheet

<b>Description</b>	<p>Hall C, Hall F and the Lounge are supplied with a switch that provides connectivity via Ethernet to the Internet and Production Office (as required).</p> <p>The switch can be found in each case directly next to the main distribution box of each event area.</p>
<b>Technical specifications</b>	<p>Cisco switch/router for wired Ethernet with RJ45 ports, configured as follows:</p> <p>Ports 1-6: Internet access, IP is configured using DHCP</p> <p>Port 7 (optional): reserved for WLAN usage in connection with an access point.</p> <p>Port 8 (optional): Configured for Voice over IP as part of the Cisco installation at ewerk GmbH.</p>
<b>Login data</b>	<p>You do not need any login data; the IP is assigned using DHCP. If you use the optional WLAN access point then you will be issued with your login data on-site.</p>
<b>Bandwidth</b>	<p>The bandwidth of the DSL connection available is 16 Mbit down and 6 Mbit up.</p>
<b>Maximum cable length</b>	<p>Using a CAT7 cable: 100 m signal range from the switch.</p>
