

UFO Walk One Sheet

Description	<p>The UFO Walk connects the event areas in Hall C, Hall F and A9 with the entrance to the roof. The rounded design blends with the tower-like architecture.</p> <p>The construction consists of 2 rounded ground supports from Alutruss. This can also be erected separately.</p> <p>The roofing area is made from air-inflated membrane cushions, which are transparent and domed.</p>					
Total			Area	170 m ²		
Larger circle	d	9.00 m	Area	125 m ²	Clear height	5.00 m
Smaller circle	d	7.50 m	Area	75 m ²	Clear height	3.50 m
Function	<p>The UFO Walk is rainproof. Furthermore, it can also be used as ground support for lighting and sound systems.</p> <p>It possesses a 32 A mains distribution box that can be used for production, as well as a pressure monitor plus compressor.</p>					
Safety procedures	<p>Necessary fire service access through Yard III is ensured.</p> <p>Escape routes for the event areas are kept clear along their full length into the open area.</p> <p>The fire service access route must be kept free of combustible materials.</p>
